Claim Objections

Claims 32, 57 are objected to because of the following informalities: The term "performing" should be inserted after "for" to clarify that the instructions are used to perform the method as set forth in the independent claims. Appropriate correction is required.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

- (b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.
- (e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 1-8,10,17,20,23-27,29,31-41,43,48,51,53-58 rejected under 35 U.S.C. 102(e) as being anticipated by Hillebrand et al. Hillebrand et al discloses a method for skin imaging and analysis using simulated images which then show altered images using a cosmetic product.

Claims 1-7,10,14-16,24-27,31-40,43,46-47,54-58 are rejected under 35 U.S.C. 102(e) as being anticipated by Hayes, Jr. et al. The claims are directly readable on Hayes Jr. et al which disclose simulation of cosmetic reconstruction in real time.

Claims 33,58 are rejected under 35 U.S.C. 102(b) as being anticipated by Apple Corps. The claims are directly readable on Apple Corps in that the claims merely set

Application/Control Number: 10/024,353

Art Unit: 3737

forth a system comprising a processor. The processor disclosed by Apple Corps is considered to be capable of performing the method.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

Claims 1-32,34-57 are rejected under 35 U.S.C. 103(a) as being unpatentable over Massengill. Massengill discloses all of the claimed limitations except for the use of a simulated facial image. In the absence of any showing of criticality or unexpected results, the use of a simulated image of the patient or a real image of the patient taken from a photograph would have been an obvious design choice. The method of Massengill is applicable to all cosmetic areas of the body. The cosmetic product can be viewed to be the cosmetic surgical procedure. It would have been obvious to one skilled in the art to have showed the facial changes in combination with images of the entire patient dressed in clothing in order to more completely assess the changes to the patient's face.

Claims 8,9,11-13,17-23,28-30,41,42,44,45,48-53 are rejected under 35 U.S.C. 103(a) as being unpatentable over Hayes, Jr. et al. Hayes Jr. et al which disclose simulation of cosmetic reconstruction in real time. It would have been obvious to one skilled in the art to have applied any known type of cosmetic changes to the patient. Furthermore, it would have been obvious to one skilled in the art to have showed the facial changes in combination with images of the entire patient dressed in clothing in order to more completely assess the changes to the patient's face.

Art Unit: 3737

Response to Arguments

Applicant's arguments with respect to claims 1-58 have been considered but are most in view of the new ground(s) of rejection.

Conclusion

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Ruth S Smith whose telephone number is (703) 308-3063. The examiner can normally be reached on M-F 5:30 AM- 2:00 PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Angela Sykes can be reached on (703) 308-5181. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
